

This pdf file serves as a means for me to explain the contents of this crude FTP site. If I had the skill and/or the time, I might be tempted to build a “normal” web site. However, this will simply have to suffice for now – its getting close.

Alt&Press&Temp.xls – this is simply a Microsoft Excel file showing the temperature of boiling water and/or condensing steam at various altitudes and barometric pressures.

DigThermAdptr6.pdf – the version of the document concerning the digital thermometer adaptor and the Taylor 524, 3516, 9841, and 9840 family of thermometers.

Digital Thermometer Build.pdf – pictures showing the building of the thermometer from A to Z.

Illustrations/ (sub-directory)

E61_STD1.jpg – an E61 drawing showing the length dimensions of the three valves.

E61_VBM.jpg – an annotated version of the VBM manual lever grouphead as found on VBM machines.

E61_STD.jpg – - an annotated version of Lino Verna’s (Verna Design, Inc.) drawing of the grouphead as found on Quickmill, Isomac, Giotto, etc., machines.

Elektra_Hydraulic_R01.pdf – this is a diagram of the hydraulics applicable to Elektra A1 and T3 machines. It was created by Brad Seaman – an avid CG poster and great person. Unfortunately, Brad passed away in May 2008.

IS_ELEC3.jpg – a diagram of the Isomac Millenium electrical system. This is a drawing created by me and there is NO RESTRICTION on your use of it.

QM_ELEC_1.jpg - the electrics of the Quickmill Anita, Andreja, and, to some extent, Vetrano. This is a drawing created by me and there is NO RESTRICTION on your use of it.

QM_ROT.jpg – the hydraulics of the Quickmill Vetrano. This is a drawing created by me and there is NO RESTRICTION on your use of it.

QM_VIB.jpg – the hydraulics of the Quickmill Anita and Andreja. This is a drawing created by me and there is NO RESTRICTION on your use of it.

VIB_ELEC.jpg - a diagram of the Vibiemme Domobar Super electrical system. This is a drawing created by me with assistance from two very knowledgeable owners of this machine and there is NO RESTRICTION on your use of it.

PID/ - a sub-directory of this FTP site containing a helpful PID document.

Pricing_Inventory_Ordering.pdf – sorta self explanatory and I try to keep it up to date. However, it contains important shipping information especially for overseas shipments.

Quest_Thermocouples_04 – a pdf document showing the application of thermocouples and adaptors to the Quest Coffee Roaster.

Rancilio Silvia/ - a sub-directory of this FTP site. This sub-directory contains drawings created by me and there is NO RESTRICTION on your use of it.

Readme.pdf – this PDF file you are currently looking at.

Thumbs.db – evidently something Microsoft needs.

Water Quality/ – a sub-directory of this FTP site. This sub-directory contains a pdf version of Jim Shulman's document entitled [Jim Shulman's Insanely Long Water FAQ](#).
