

ReadMe.doc

This simple text file serves as a means for me to explain the contents of this crude FTP site. If I had the skill and/or the time, I might be tempted to build a “normal” web site. However, this will simply have to suffice for now.

Adaptor Tidbits.pdf - a catch-all file that attempts to answer some common questions not covered in the documents particular to a specific device.

Adaptor06.pdf – although this document describes the 1/16” thermocouple adaptor for the Rancilio Silvia, custom installs, and E-61 machines, it is also appropriate for thermocouple installations utilizing the latest 1/8” thermocouple adaptor.

Alt&Press1.xls – this is simply a Microsoft Excel file showing the temperature of boiling water and/or condensing steam at various altitudes and barometric pressures.

DigThermAdptr3.pdf – the version of the document concerning the digital thermometer adaptor and the Taylor 524, 3516, 9841, and 9840 thermometers.

E61_2.jpg – an annotated version of Lino Verna’s (Verna Design, Inc.) drawing of the E-61 grouphead.

Elektra_Hydraulics_R01.pdf – this is a diagram of the hydraulics applicable to Elektra A1 and T3 machines. It was created by Brad Seaman – an avid CG poster and great person. Unfortunately, Brad passed away in May 2008.

IS_ELEC3.jpg – a diagram of the Isomac Millenium electrical system. This is a drawing created by me and there is NO RESTRICTION on your use of it.

PID/ - a sub-directory of the FTP site containing lots of helpful PID documents.

Pricing_Inventory_Ordering.pdf – sorta self explanatory and I try to keep it up to date. However, it contains important shipping information especially for overseas shipments.

QM_Elec1.jpg - the electrics of the Quickmill Anita, Andreja, and, to some extent, Vetrano. This is a drawing created by me and there is NO RESTRICTION on your use of it.

QM_ROT.jpg – the hydraulics of the Quickmill Vetrano. This is a drawing created by me and there is NO RESTRICTION on your use of it.

QM_VIB.jpg – the hydraulics of the Quickmill Anita and Andreja. This is a drawing created by me and there is NO RESTRICTION on your use of it.

Rancilio Silvia/ - a sub-directory of this FTP site. This sub-directory contains drawings created by me and there is NO RESTRICTION on your use of it.

Readme.pdf – this PDF file you are currently looking at.

VIB_ELEC.jpg - a diagram of the Vibiemme Domobar Super electrical system. This is a drawing created by me with assistance from two very knowledgeable owners of this machine and there is NO RESTRICTION on your use of it.
