

# READING GRAPHIC NOVELS

With Ryan Evans  
M.S. MIT Media Lab

A four-week course  
exploring and  
discussing acclaimed  
graphic novels and the  
unique storytelling  
medium of comics.

At the Cambridge Center  
For Adult Education in  
Harvard Square

Why are graphic novels  
suddenly so popular?

What's up with all the movies  
based on comic books recently?

I thought comics were  
just for kids.

Why read a graphic novel when  
you could read a regular book?

I wonder what we'll read...

Love & Rockets by  
**Jaime Hernandez**  
An epic of love and tragedy  
set among punk rock and  
gang warfare

The Freddie Stories  
**Lynda Barry**  
Childhood's cruelties and  
pleasures in luminous  
detail

Jimmy Corrigan:  
The Smartest Kid on Earth  
**Chris Ware**  
Winner of the Guardian &  
American Book Awards

Ghost World by  
**Dan Clowes**  
Beautiful, hilarious,  
strange and quietly moving  
-Village Voice
